Basic ER for Amaze Care

Features

Report
id
Test Name
Date of test taken
file
patient

→ medical Report history of patient
 → Doctors availability

Main Workflow

=.

Admin adds doctor

Doctor adds Availability.

Patient registers

Login

Patient searches doctor
by specialization,
availability

Books slot (enter appointment date)

Appointment
= pending

Doctor confirms./cancel

Consultation happens, (Appointment completed)

Patient can view medical history (list of consultations)

Book App → Enter Specialty.

Doc List in that specialty
↓
(choose) doctor
↓
will get

Patient
Book Appointment
Cancel
View all appointments
(Confirmed/Pending)
View appointment by status

Availability list
↓
using the doc id
I will show

Along with

Enter Date to Book Appointment: YYYY MM DD

It is a calendar where all 'peru' slots will be disabled

I have doctor id & date.

using this I will give list of slots

Appointments → sort by time

check the clash in patients appointment

Slot 1	st time	end time	Book
Slot 2	st time	ed time	Book
Slot 3	st time	ed time	Book

Suppose

Slot 3 Book is clicked

This is a Button to with Book, after Confirmation start.

Then a form to fill symptoms, nature of visit, etc must with be of patient

(details)

using doctor id, date, Start time, end time.
details patient (using principal)
→ Book Appointment (pending)

Reporte

id (PK)(AI)(NN)
 name (NN)
 testtakendate (NN)
 file (NN)
 patient (fk)

File from patient device Add

In patient Dashboard

Medical Records Button

List of

Test Report Button

(using the patient name get all reports from report table & show)

Reporte	Add
	update delete
	update delete
	updt dele

So, patient can Add,

Also update by Id } using delete by Id } In row buttons

List of **Consultations** Button

Previous Consultations of that patient
 ↓
 List of consultations

(using the patient name, get all appointments id, from app & get those correspond Consultation)

(patient name got from principal)

In Doctors, while doing Consultation for an appointment

view medical record

form for Consultation

When **do consultation** is clicked (In row buttons on upcoming confirmed appointment list), we can take that appointment Id. → patient name

When **Medical record** is clicked → **Test Reports** Show 2 buttons → **Past consultations**

if **Past Consultations** button clicked, we pass patient name & get same list as we get for patient.

if **Test Reports** button clicked

Reports

(since we only have doctor in principal)

Show without Add, update, delete
